

DVG AUTOMATION

the excellence in flow control automation

"QT" SERIES
Pneumatic ACTUATORS

INTRODUCTION

The DVG Automation newly designed "QT" Scotch Yoke Series incorporates several new design features to provide higher efficiency and cost effective solution.

These actuators show compact design but above all introduce a new generation of patented mechanism which minimizes wearing effect on all loaded & sliding parts, thus extending overall lifespan.

These features boost our QT Series for all modulating as well as heavy-duty services virtually fitting any quarter turn (90 deg) application.

OPERATING RANGE

The DVG Automation Double-acting QT Series Actuators are available with individual test and guaranteed minimum output torque ranging from 1,800 Nm (15,900 lb-in) to 180,000 Nm (1,593,000 lb-in).

Our Single Acting QT series Actuators produce spring ending torque ranging from 1,350 Nm (11,950 lb-in) to 60,750 Nm (537,650 lb-in).

Further torque ranges available on request

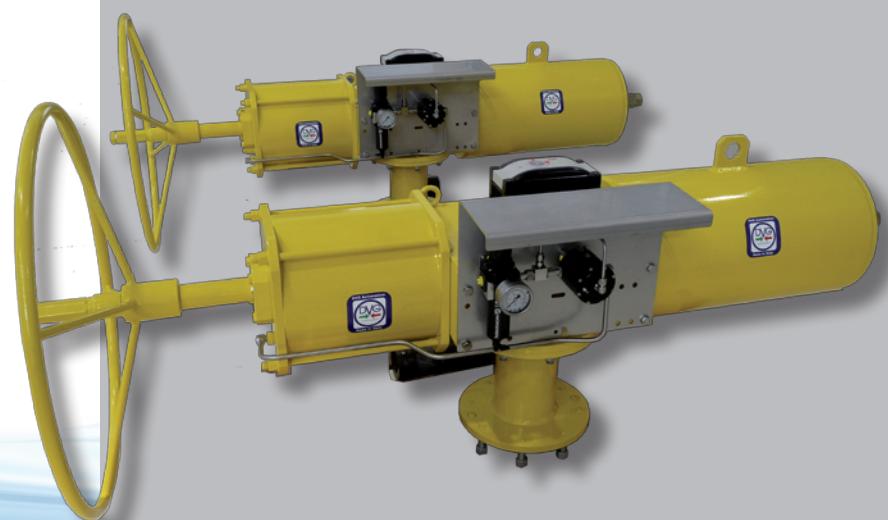

The Pneumatic operating pressure for the QT Series ranges between 3 barg (45 psig) to 12 barg (175 psig).

Standard design construction allows operating temperature from -30 degC (-22 degF) to +93 degC (+199 degF).

Low temperature design extends operating range down to -60 degC (-76 degF).

Supply medium:

Instrument air, nitrogen, sweet gas. Special version available for sour gas.

KEY DESIGN FEATURES & ADVANTAGES

Scotch Yoke:

PATENTED mechanism introduces three main features:

Quad Guide Bars Design

Piston Rod-Guide Block New Design Connection

Closed Drive Yoke Wings for all Center-body Sizes

Mechanism Guide System:

PATENTED Quad Guide Bar hard chromium plated zeroing guide block swing extending piston rod lifespan under heavy load &/or continuous modulating duty and void any side load to be imparted on valve stem.

Excellent surfaces finish and self lubricate bearings accomplish higher overall efficiency.

External Tie Rod:

External tie-rod design provides operational safety and maintains cylinder integrity.

Symmetric or canted yoke:

QT Series is available with either symmetric or canted yoke design depending on valve torque profile demand.

Water ingress protection:

Totally enclosed and weather-proof actuator center-body is engineered to meet IP66, IP67 IP67M and NEMA 4 & 4X Specifications for submerged and high pressure water deluge applications.

Materials:

Cylinder Tube & all structural parts are manufactured in carbon steel material:

no cast/grey iron or aluminum parts are present.

All pressure containing parts are supplied with 3.1 Certificate according to EN10204.

DVG Automation guarantees, where applicable, that actuator are designed and manufactured according to PED (97/23 CE) Directive.

Corrosion Prevention:

Cylinder tube is internally nickel-plated lined (minimum 25µm). Nickel-plating layer can be increased upon request.

External coating provides higher reliability in harsh environmental conditions as per ISO 12944 (Expected Durability) and in compliance with NORSO M-CR-501 requirements.

Seal:

Floating type piston seal prevents sticking phenomena after prolonged operation-less period and ensures reduced hysteresis and high sensitivity.

Bearing:

Dual piston PTFE sliding guide, yoke and guide block are mounted with steel bronze Teflon coated bushing to minimize wearing effect and show higher sensitivity.

ISO Valve Mounting:

The QT Series valve interface responds to ISO 5211 dimensional requirements according to specific torque range. Different arrangements can be evaluated to meet specific need (i.e. MSS SP-101, etc.); direct mounting is feasible if available space permits.

Labeling:

AISI 316 Stainless Steel embossed name plate ensures long lasting information preservation, thus guaranteeing lifetime traceability.

Travel stops:

External travel stops with protective cap ensure precise angular stroke adjustment up to -5deg/+5deg at each end.

Versatility & Modularity: key features for a successful design

The QT series has been designed with modular concept in mind so to have field repairable center-body, power, spring and override modules available as individual purchase to optimize spare parts inventory. Each module can be removed, serviced &/or replaced while actuator is still assembled onto the valve.

Specifically power module is designed and constructed to allow pressure testing independently from the center-body.

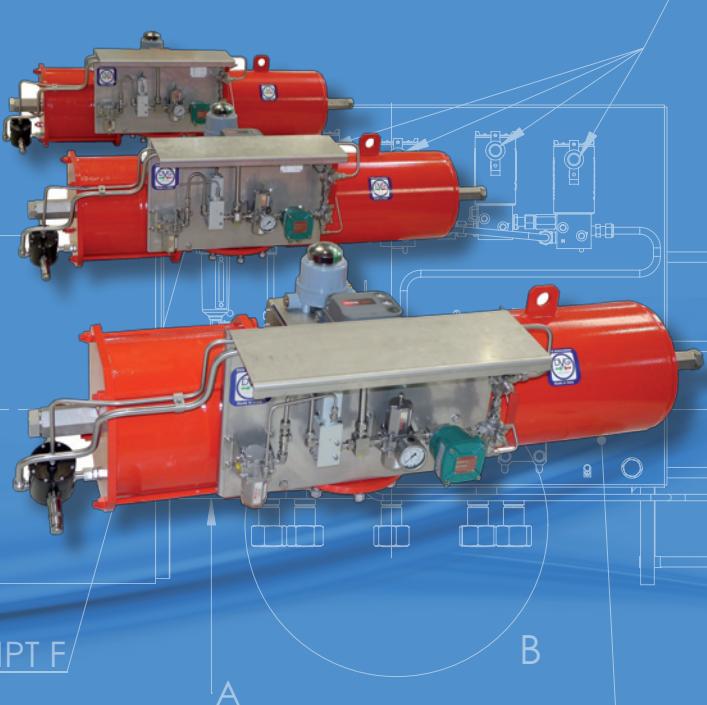

Power and spring modules can be easily swapped allowing fast fail safe action reversal.

Safety:

Lifting point by means of DIN certified eyelet located on actuator center-body.

Fully welded o-ring sealed spring canister module is inherently safe; the DVG Automation adopted system allows safe assembly/disassembly without any risk for the personnel due to residual spring force.

PNEUMATIC CONNECTION 1/4" NPT F

OPTIONAL FEATURES

Mounting pad:

Accessory mounting pad allows dual side mounting & does not require any fixing modification in case of rear side assembly.

Manual Override Option:

Cost effective jackscrew is available for the DVG Automation QT Series where torque demand permits. It is important to note that, when equipped with jackscrew, separate travel stop adjustment screw is maintained so avoiding any mal-positioning of the override and finally of the valve automated package. Jackscrew offers the following benefits:

- Full rated torque is developed by the actuator in case of pneumatic supply failure;
- Available with declutch-able and locking devices to avoid spurious actuator operation;

When torque demand increases DVG Automation offers reduction gear manual override to maintain sustainable rim pull efforts.

As additional alternative, DVG Automation provides hydraulic manual override (MH) to operate the valve in lack of power supply, particularly indicated in double acting actuators. It also allows precise & independent stroking time adjustment, smooth operation throughout the entire travel. Hydraulic manual override consists of a hydraulic cylinder mounted directly on actuator driven by a hydraulic control unit inclusive of: hand-pump, directional control valve, oil tank, relief valve and one-way flow restrictor. Remote mounting hydraulic control units are available: contact factory.

Mechanical locking device

This external device is wafer-mounted between the actuator and the valve, normally integrated in valve mounting hardware. It offers basic partial stroke testing for Emergency Shutdown Valve automated package and it can be used for other safety process applications. The locking device mechanically limits the valve/actuator assembly travel to 20deg (or as per specific Customer request) clockwise or counter-clockwise. Once disengaged, the complete assembly is free to travel for the entire stroke with no interference.

CONTROL SYSTEM

Actuator Control Systems are integral part of any automated valve package. Our QT Series Actuators can be equipped with an extensive range of auxiliary components specifically engineered and integrated to meet the largest variety of Customers' requests either for ON/OFF or modulating duty.

Our Control Systems can be housed within cabinet &/or stainless steel (AISI316) panel folded over to provide sun-shade, and assembled on actuator or at remote location.

DVG Automation has already pre-engineered different solutions to meet the most commonly required control systems. These solutions, based on standard components, offer reduced lead time, simplified purchasing, commissioning and start-up activities. Please contact factory for any additional detail.

Position Monitor Device:

All positioning monitor devices can be assembled on top of our QT Series actuators, responding to any kind of technical requirement.

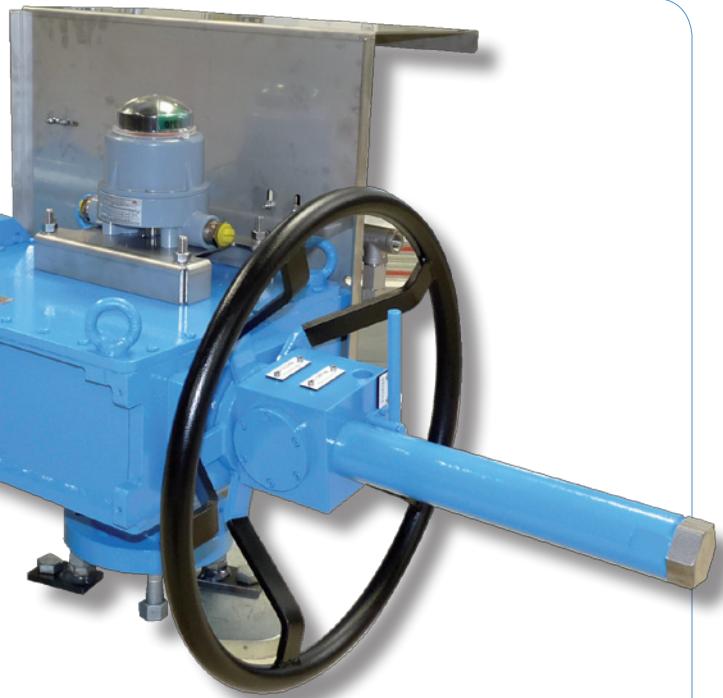

MANUAL OVERRIDES

- Hydraulic manual override

5

- Jackscrew – Closed type

- Declutchable

- Reduction gear

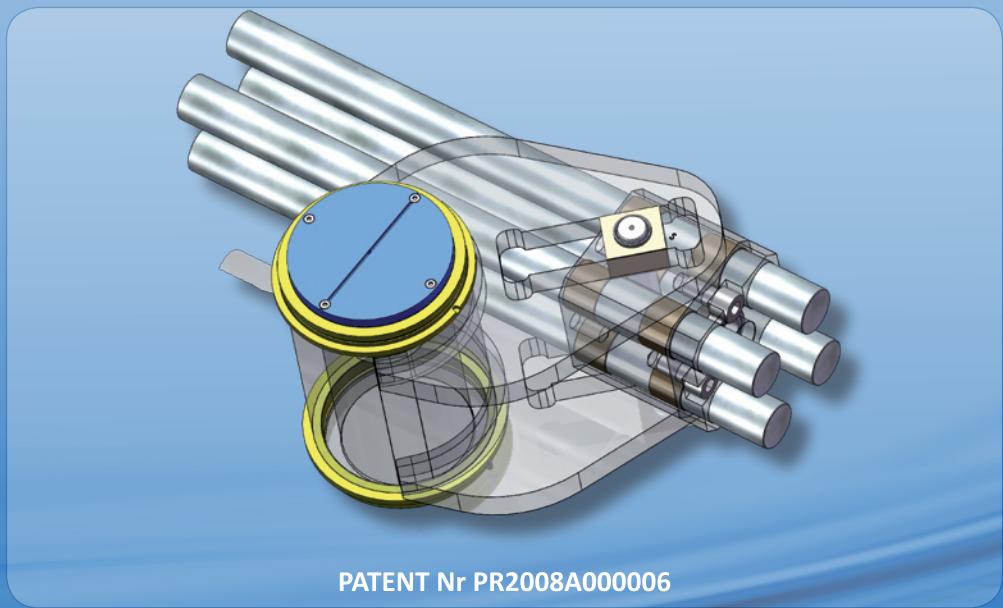

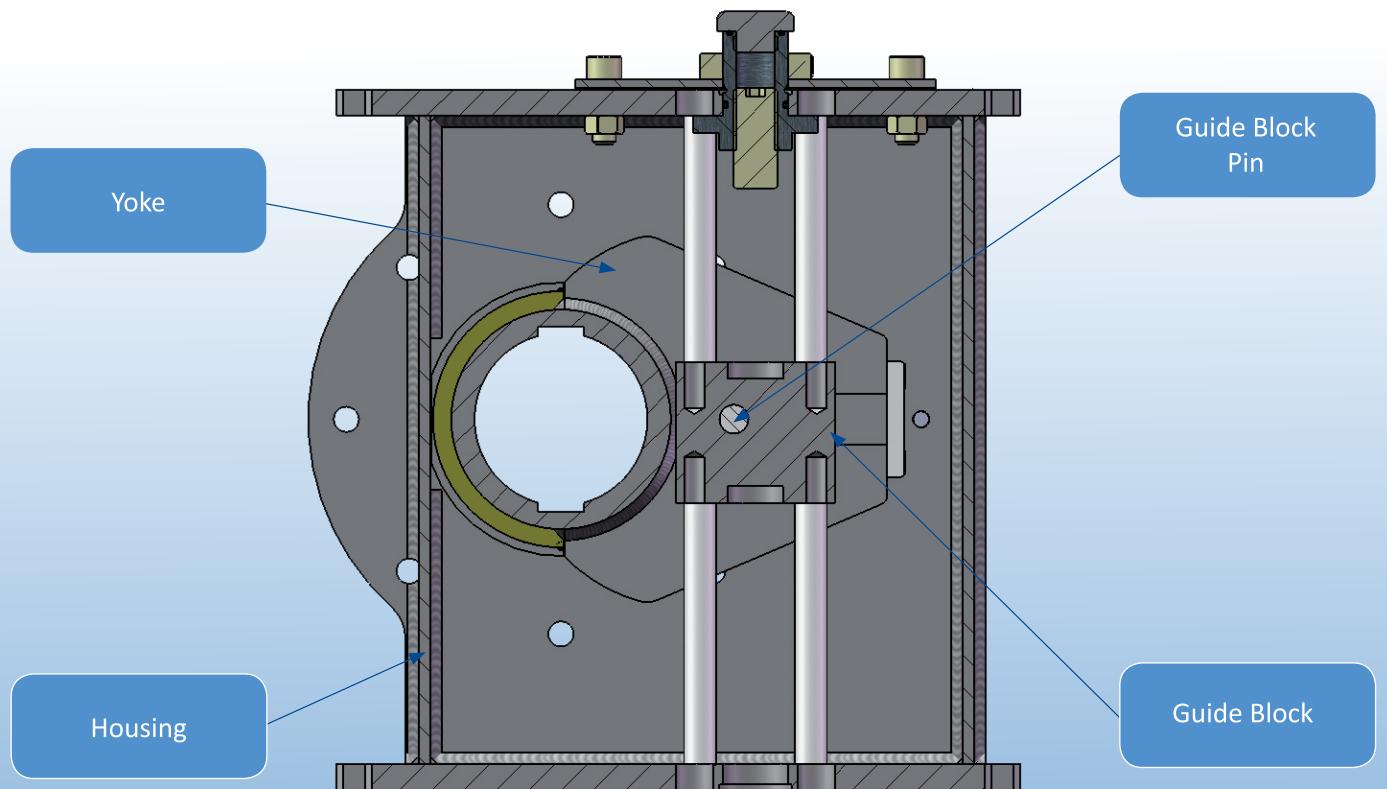

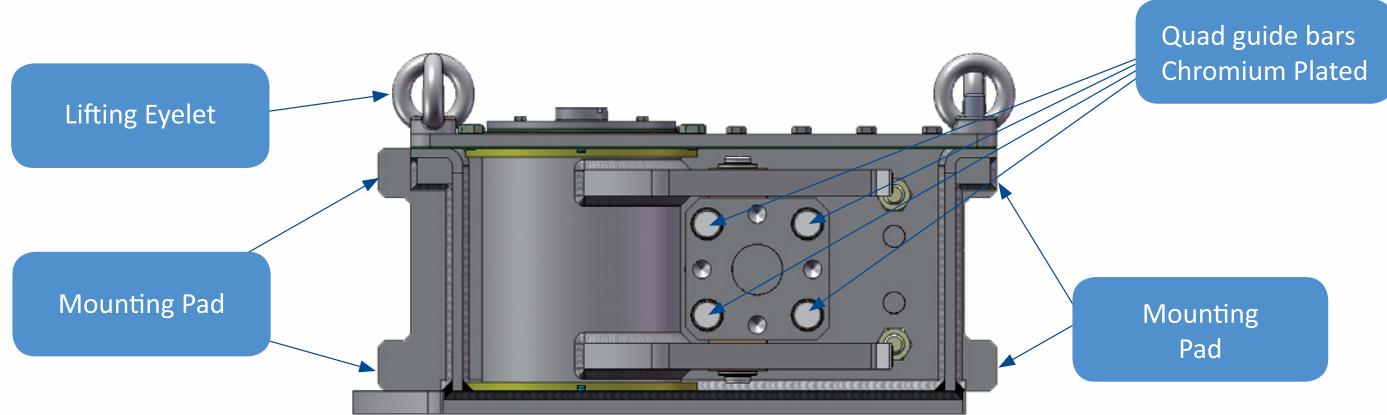

- Direct handwheel
